Faculty Position in Experimental High-Energy Physics at the Ecole polytechnique fédérale de Lausanne (EPFL)

The School of Basic Sciences of the Ecole Polytechnique Fédérale de Lausanne (EPFL) seeks to appoint a tenure-track assistant professor of experimental high-energy physics in the Institute of Physics.

The Laboratory for High-Energy Physics is strongly involved in the LHCb experiment at CERN’s Large Hadron Collider from the time of its conception, and is currently making a major contribution to the detector upgrade, with a view to enhance data-taking capability to extend the science reach from 2021 onwards. The position offers the opportunity to capitalize on this investment while also developing ideas for the longer-term future, in an environment providing strong technical support in detector development.

A PhD degree in particle physics as well as a strong and growing track record in research and scientific leadership are required. The appointed professor is expected to initiate a creative experimental program, and engage in physics teaching at undergraduate and graduate levels.

Significant start-up resources, research budget and state-of-the-art research infrastructure are available. Salaries and benefits are internationally competitive.

Applications should include a motivation letter, a curriculum vitae with a list of research outputs, a statement of research (max. 3 pages) and teaching interests (max. 1 page), as well as the names and addresses (including e-mail) of at least three references.

Application files should be submitted in PDF format and uploaded by December 15th, 2017 to https://facultyrecruiting.epfl.ch/position/6848513

Enquiries may be addressed to:
Prof. Harald Brune
Chairman of the Search Committee
